

■ Microsoft Entra ID Story with Society Example

1. Malik = Tenant / Root Admin

Jaise ek society ka builder ya malik hota hai, waise hi Entra ID ka Tenant Owner (Global Admin) hota hai. Malik sabse pehle ek society (Tenant) banata hai aur decide karta hai ki isme kaun rahega aur kisko kya rights milenge.

2. Residents (User Accounts)

Har resident ko ek Access Card (Username & Password) diya jata hai. Is card ke bina society me entry nahi milegi.

3. Security Guards = Authentication

Gate par guard check karta hai ki card valid hai ya nahi. Yehi authentication process hai.

4. Different Areas = Applications

Society ke alag-alag areas (Gym, Pool, Parking, Hall) alag-alag applications ki tarah hote hain.

5. Permission Levels = Roles

Har resident ko har jagah access nahi hota. Sirf jo role me hain unhi ko uss area ka access milta hai.

6. Guest Entry = Guest Users (B2B)

Guest ko temporary pass milta hai jo sirf limited access deta hai. Yehi B2B external users jaise hai.

7. Visitors with OTP = MFA

Kabhi OTP ya phone verification bhi hota hai taaki asli aadmi hi entry le. Ye MFA ka example hai.

8. CCTV & Monitoring = Logs

Society me CCTV record karta hai kaun kab aaya gaya. Yehi Entra ID ke monitoring & audit logs hote hain.

9. Emergency Rules = Conditional Access Policies

Jaise society me rule hai raat 11 ke baad gym band hoga, waise hi conditional access policies hoti hain.

■ Final Mapping

Society	Microsoft Entra Tenant
Residents	Users
Access Card	Username & Password
Guards	Authentication
Different Areas	Applications
Membership/Committee Rights	Roles
Guest Pass	External Users (B2B)
OTP at Gate	MFA
CCTV	Monitoring & Logs
Society Rules	Conditional Access
