

■ Root Raja aur Uska Linux Kingdom ■

/

Ye Raja ka **Rajmahal ka darwaza** hai. Sab mahal isi gate ke andar bante hain. Iske bina koi kingdom hi nahi.

/root

Ye Raja ka **personal bedroom** hai. Sirf Raja (root user) hi yaha jaa sakta hai.

/home

Ye Raja ne apne **praja** (users) ke liye gali-mohalle aur ghar banaye. Har user ka apna ek ghar hota hai yaha.

/bin

Raja ne ek **tools ki shop** banayi hai jisme daily use ke chhote tools hote hain (ls, cp, mv).

/sbin

Ye hai Raja ka **secret arsenal** ■. Yaha bade-bade administrative weapons hote hain (reboot, shutdown).

/etc

Ye hai Raja ki **library of rules** ■. Yaha kingdom ke saare kanoon aur configuration likhe hote hain.

/var

Ye hai Raja ka **warehouse** ■ jaha roj ka maal jama hota hai — logs, mails, aur temporary data.

/tmp

Ye hai Raja ka **weekly haat bazaar** ■. Yaha sirf temporary saman aata hai, market band hote hi sab khatam.

/usr

Ye hai **University of the Kingdom** ■. Yaha knowledge aur bade tools stored hote hain.

/boot

Ye hai Raja ka **secret garage** ■. Jaha se kingdom ka engine (kernel + bootloader) start hota hai.

/dev

Ye hai Raja ki **magic factory** ■■. Yaha devices ko insaan ki tarah treat kiya jata hai.

/proc

Ye hai Raja ka **spy agency** ■■. Ye live report karta hai ki system me abhi kya ho raha hai.

■ **Funny Dialogues**

Banti: Bhai ye /root aur /home me kya difference hai?

Babli: Pagal! /root to Raja ka bedroom hai, aur /home praja ke ghar. Raja aur praja ek hi jagah kaise rahenge?

Banti: Acha ye /tmp kya hai?

Babli: Arre wo to weekly haat bazaar hai, raat hote hi saara saman gayab.

Banti: Aur /etc?

Babli: Waha kanoon bante hain, agar galti se delete kar diya to kingdom me aandolan ho jayega!
